

## CASE STUDY

### Williamsons Model Land, Bentley

#### SERVICE PROVIDED

- Energy Health Check
- Energy Procurement

**Williamsons Model Land, based in Bentley is a family run business specialising in top quality remote control cars, trucks helicopters, tanks and planes. The company is a member of Doncaster Chamber of Commerce and has access to a wide range of Chamber Energy Solutions services, through the Chambers partnership with leading energy consultancy, Utilitywise plc.**

Williamsons Model Land contacted Chamber Energy Solutions, using the free phone help line number. The company were looking at gaining comparison pricing for their utilities bills whilst also interested in gaining an overview of their current energy usage. Our Account Manager began the process by offering the customer an Energy Health Check (EHC), which is free to members of Doncaster Chamber of Commerce.

The EHC rates your business premises for energy efficiency and benchmarks it against other similar properties in your industry. It gives an accurate understanding of how much energy you're using and what kind of cuts in consumption are realistic for your business.

Following the EHC, our Account Manager also conducted a bill analysis for the client. The bill analysis showed that the client was currently charged at out of contract rates for electricity and variable rates for gas, the out of contract rates were particularly high and therefore we organised to gain comparison pricing from a range of alternate suppliers. The client opted for a new fixed term contract for both gas and electricity and we combined contract end dates with one supplier to ensure Williamsons Model Land would not be rolled over into out of contract rates in the future. The client, Mr Waddington, was delighted with the new rates and fixing into a longer term contract, he also praised the customer service offered by the Chamber Energy Solutions team.
